

NORTH HARBOUR RUGBY UNION
Improving Lives Through Rugby

04/04/2022

North Harbour Rugby Union has welcomed the Government's upcoming changes to the Covid-19 Protection Framework.

From 11:59pm on 4 April 2022, vaccine passes will no longer be required for community rugby.

The changes allow community rugby competitions to be available to all participants, regardless of vaccination status.

Under the updated traffic light settings there are no spectator limits to outdoor activities and no requirements for face masks.

Player safety remains a focus and detailed guidance for players returning to rugby safely following a Covid-19 infection is now available at www.nzrugby.co.nz/covid-19.

New Zealand Rugby will provide more detailed guidance on community rugby under the updated traffic light settings in the coming days.

Under red setting

From 11:59pm on 4 April 2022:

community rugby participants do not need to use a My Vaccine Pass

there will be no limits for outdoor activities

you do not need to wear a face mask outdoors

face masks are required in most indoor settings

there is no requirement to scan in.

For the avoidance of doubt, all requirements to wear face masks outdoors will be removed, but all clubs need to adhere to the government regulations for hospitality establishments. i.e. 200 people maximum allowed in doors from 26th of March 2022. The responsibility to manage this will rest with each individual club

Gerard van Tilborg

Chairman of the Board / Acting CEO
